Dear Wargaming Team,

With over 5 years of experience managing international, cross-functional teams in Mobile Gaming, SaaS, and AI, I'm confident in my ability to bring structure, focus, and momentum to the World of Tanks Blitz team.

I specialize in Agile delivery, team coordination, and stakeholder alignment—creating clarity in fast-paced environments and driving teams toward measurable outcomes. I've led distributed teams using Jira and Confluence, optimized delivery processes, and facilitated full-cycle Agile rituals.

As a long-time gamer with 300+ hours in World of Tanks, I understand the product and its players. I bring both operational discipline and genuine passion to the role—ready to support teams in building even better gameplay experiences.

Looking forward to the conversation.

Best regards,

Alexander Tarashkevich
