SUMMARY

Senior Project Manager with 5+ years of experience leading cross-functional teams across mobile, AI, e-commerce, and B2B/B2C platforms. Proven track record in delivering complex digital products, improving operational efficiency, and driving measurable business outcomes. Skilled in Agile delivery, stakeholder alignment, roadmap execution, and managing distributed teams. Adept at translating ambiguity into clear plans and consistently shipping high-quality results on time and within scope.

EXPERIENCE

Finespace - B2C products across AI, mobile gaming, e-commerce

Vilnius, Lithuania

Senior Project Manager

February 2022 - Present

- Delivered 10+ MVPs across AI and gaming apps by organizing iterative sprints, managing risks, and ensuring cross-team coordination.
- Oversaw 40+ team members across 3 time zones (engineering, QA, design), ensuring consistent delivery cadence and clarity of ownership.
- Managed backlog grooming, sprint planning, and delivery pipelines for AI and mobile app teams.
- Collaborated with marketing, data, and creative teams to align timelines and prepare product launches.
- Improved release quality and velocity by implementing structured QA workflows and retrospectives.

Webspace - B2B and B2C platforms (beauty, entertainment, logistics, invoicing)

Minsk, Belarus

Technical Project Manager

July 2021 - February 2022

- Introduced Agile and CI/CD practices across 3 cross-functional teams, reducing release cycles by 24%.
- Defined SDK requirements and integration guides, decreasing partner API onboarding time by 30%.
- Managed project scope, timelines, and client communication for 7 active platforms (B2B and B2C).

Attico - Enterprise digital agency serving Fortune 500 clients

Minsk, Belarus

Project Manager

November 2019 - July 2021

- Delivered enterprise-grade digital platforms for Fortune 500 clients, ensuring delivery scalability and uptime.
- Streamlined QA and release pipelines, improving throughput by 35% and reducing critical post-release bugs by 20%.
- Coordinated between design, frontend/backend, and QA teams to deliver on tight client deadlines.

Borovoy Studio

Minsk, Belarus

Frontend Developer

April 2019 - November 2019

- Developed a website for KIA Motors with focus on speed and responsive design
- Built production web applications using JavaScript (ES6+), React, HTML5/CSS3 with focus on performance optimization
- Integrated RESTful APIs and third-party services, working with JSON data structures and async programming
- Utilized Git for version control, Webpack for bundling, and Chrome DevTools for debugging and performance profiling
